

DIEGO REYES ALTAMIRANO

Atenco, México (Remote – LatAm) | +52 555 127 9802 | diego.reyes.tcp@gmail.com | [linkedin.com/in/diego-reyes-altamirano](https://www.linkedin.com/in/diego-reyes-altamirano)

PROFESSIONAL SUMMARY

Technical Lead Manager with 9+ years in software engineering and 6+ years leading distributed engineering squads (up to 12 engineers across 4 countries) in Rappi's high-growth fintech environment. Player-coach who stays hands-on with architecture and code while owning delivery, quality, and people development — running bi-weekly 1:1s, semi-annual performance cycles with peer and leadership feedback, and fostering psychological safety. Led on-call rotations and incident war-rooms with full postmortem ownership, using Grafana and New Relic for monitoring and OpsGenie for escalation. Regular user of AI tools (Claude, ChatGPT, OpenAI API) for code optimization, verification, and PostgreSQL query refinement. Track record in payments/fintech products (RappiCard, BBVA Bancomer), infrastructure cost optimization (-20%), and engineering standardization (+20% velocity via Design Systems).

CORE COMPETENCIES

People & Team Leadership — Bi-weekly 1:1s, performance feedback cycles, career coaching, hiring & onboarding, psychological safety

Technical Leadership — Architecture decisions, code reviews, Kotlin/Spring Boot microservices, cross-stack squads (Backend, Mobile, QA)

Incident & On-Call Management — Weekly on-call rotation, OpsGenie alert escalation, war-room facilitation, postmortem ownership

Observability & Delivery — Grafana, New Relic monitoring, quarterly planning, sprint ceremonies (Jira), backlog ownership, test coverage

Cloud & DevOps — AWS (ECS, S3, SFTP), Kubernetes, Jenkins CI/CD, Docker

AI Fluency — Claude, ChatGPT, OpenAI API — code optimization/verification, SQL query tuning, squad AI-adoption tracking

Security — OAuth2, JWT, IP whitelisting

Methodologies — Scrum (Certified), Agile

LANGUAGES

Spanish (Native) | English (Working proficiency — B1)

PROFESSIONAL EXPERIENCE

Engineering Lead — Rappi

Remote, Mexico | Jan 2022 – Nov 2025

- Led a multidisciplinary squad of 12 engineers (Mobile, QA, Backend) distributed across Mexico, Colombia, Peru, and Chile in a hyper-growth fintech environment.
- Ran bi-weekly 1:1s and semi-annual growth/performance cycles incorporating peer and leadership feedback, fostering psychological safety and clear individual development plans.
- Participated in hiring and onboarding for new engineers joining the squad.
- Owned weekly on-call rotation for service alerts and user-reported tickets, using Grafana and New Relic dashboards for monitoring and investigation; redefined OpsGenie escalation rules across rotation, lead, and management tiers.
- Led war-room sessions for critical incidents, driving rapid resolution and owning postmortem documentation and follow-up.
- Owned quarterly planning and initiative documentation; served as owner of the team's Jira board, backlog, and all sprint ceremonies.
- Owned regional technical delivery for RappiCard (card issuance, statements, and debt repayment flows) across Brazil and Chile as a player-coach, balancing hands-on IC work with squad leadership.
- Directed architecture and standardization for microservices built on Spring Boot and Kotlin, authoring documentation and system diagrams adopted across multiple squads.

- Built and rolled out a Mobile Design System adopted by 7 product teams, increasing development velocity by 20%.
- Led an infrastructure cost-optimization initiative (AWS ECS/S3, Kubernetes, database cleanup) that cut operational costs by 20%.
- Implemented OAuth2, JWT, and IP-whitelisting standards for secure inter-service and partner communication.
- Applied AI tools (Claude, OpenAI) regularly for code optimization, verification, and PostgreSQL query refinement; tracked squad-wide AI adoption within the development process.

Android Tech Lead — Rappi

Mexico, distributed team | Mar 2020 – Jan 2022

- Served as first-line technical leader for the Android engineering team; defined the company's first Career Path framework for developer leveling and growth.
- Owned technical hiring — led interviews, designed evaluation methodologies, and built onboarding standards for new engineers.
- Established architecture and networking best practices adopted as the standard across multiple engineering teams.
- Built a mobile Design System reused by 7 product teams, contributing to a 20% org-wide velocity increase.

Senior Android Developer — Rappi

Mexico | Aug 2019 – Mar 2020

- Shipped critical app features, including rewards systems and card request/replacement flows, within a Scrum team.
- Introduced static analysis and automated CI testing (Jenkins), reducing production defects.

Android Developer — Grin Scooters

Mexico | Nov 2018 – Jul 2019

- Built geolocation (Google Maps) and Bluetooth lock/unlock features for a scooter-sharing mobile app using MVVM and SOLID principles.

Android Developer — BBVA Bancomer

Via consulting agency, Mexico | 2016 – Oct 2018

- Developed banking features for the Línea Bancomer mobile app, including card replacement, card blocking, and ATM/branch locator services.

EDUCATION

Computer Engineering — Universidad Nacional Autónoma de México (UNAM), Facultad de Estudios Superiores Aragón

Aug 2011 – May 2015

CERTIFICATIONS & CONTINUING EDUCATION

- Scrum Fundamentals Certified — SCRUMstudy (2017)
- Large-Scale Systems Design & Software Architecture — Udemy
- Team Leadership; Team Motivation — Platzi
- Claude Code in Action; Introduction to Agent Skills — Anthropic
- Responsible Prompting: Maximizing AI in Your Business — Santander Open Academy
